| Name of Tool: | Reinstatement Review Inventory (RRI) |
| Author/Publisher (Year) | Behavior Data Systems |

| | |
|-------------------------|---|
| Description: | <p>The Reinstatement Review Inventory (RRI) is designed for screening an applicant who has had their driver's license suspended or revoked and is applying for reinstatement of their driver's license.</p> <p>This test explores the questions, "Has the applicant changed since their driver's license was suspended or revoked?" Very few, if any other tests, have been designed specifically for "driver's license reinstatement."</p> <p>The RRI contains 124 items that comprise 6 scales:</p> <ul style="list-style-type: none"> • Truthfulness Scale • Alcohol Scale • Drug Scale • Road Rage Scale • Intervention Checklist • Comparative Changes <p>Scores are used to classify risk into four categories:</p> <ul style="list-style-type: none"> • Low Risk • Medium Risk • Problem Risk and • Severe Problem <p>These classifications, along with clinical judgment, are used to inform treatment recommendations.</p> <p>Truthfulness Scale detects offender denial, problem minimization, and response bias.</p> <p>Demonstrated reliability and validity.</p> |
| Tool Development | <p>A summary of scientific findings is available for download.</p> |
| General Notes: | <p>The RRI is a computerized assessment that provides clinicians with a printed report that includes percentile scores, risk classification, and item responses.</p> <p>The RRI takes 25-30 minutes to complete.</p> <p>Tests can be administered individually or in group settings.</p> |
